

Tefal introduces the new Ultra Compact Steamer

Groupe SEB Australia is expanding its range of Tefal Food Steamers with the launch of the highly innovative and uniquely designed VC1006 Ultra Compact Steamer.

Health and dietary concerns remain a very important issue with Australians. An increasing number of media reports highlight the growing need for healthier and well-balanced living. This is a trend that will continue as consumers take a more active interest in planning their meals. Already the market leader with innovative products, Tefal's new VC1006 enables consumers to create nutritious and delicious meals with minimal fuss.

The greatest advantage of steaming is it requires no fat. Steam cooking preserves the natural vitamins, minerals and flavours of food over other types of cooking. Stir-frying, boiling, grilling, and other high temperature heating methods destroy many important nutrients. Because the heat of steam is gentle, it therefore respects the cellular structure of food tissues as well as their aromatic composition. You can steam fish, chicken, vegetables, dim sims, dumplings and much more and reap the health benefits of fat-free cooking that produces crisp, delicious results. A simple change in our dietary habits can greatly assist in promoting better health.

The VC1006 is the most compact 3-tier steamer on the market and enables the consumer to very simply store the baskets within the unit and save a lot of space. It also has a number of highly innovative features including a turbo steam system which starts steaming in just 15 seconds. As with all Tefal steamers, it is endorsed by Weight Watchers.

Ultra Compact Steamer features include :

- 9 litre capacity
- 3 food baskets with removable bases
- Turbo steam system – starts steaming in just 15 seconds
- External water spout for easy refilling
- External water level viewing window
- 60 minute timer with alarm
- Automatic shut off
- Rice bowl included
- Dishwasher-safe baskets & bowls
